

Flitemate

Pressure Reducing Ear Plugs

Flitemate is patented ear plugs for reducing pressure & noise in ears during take-off, landing & in flight.

Flitemate benefits:

- Reduce pressure & noise in ears during take-off, landing & in flight.
- Reduces background noise without filtering out speech.
- Small hole allows ear to breath & can be in position for long periods.
- Easy to use. Made from 100% silicone. Non-toxic.
- Reusable.
- Hygienic.
- Fits most ears.
- Useful for flights, mountain driving, skiing & noisy environments.
- US Patent 6,425,398 B1

Fitting & Care Instructions

Gently pull ear outward and upward and insert plug into ear canal with a slight twisting motion. Never use force; allow plug to sit comfortably in ear. If painful, remove and reinsert. Check that plugs filter background noise and retain speech quality. If speech cannot be heard, plugs may be wrong size or inserted incorrectly. Wash with warm soapy water or 70% alcohol. Keep in case provided when not in use. In case of ear infection or problems consult a doctor before use.

Caution

For external use only.
Not for children under 12.
Keep away from infants.
